

Hunt Comfort

“The Best Seat in the Woods”™

Your comfort is what we are about. Quality goods are what we sew our name on. Commitment to you is what is inside our warranty.

The Secret Ingredient

For over 10 years, we have given hunters, like you, the benefit of true pressure relief with our special formula gel and foam cushions. The secret is enjoyed by thousands of hunters.

What we do

Our name says it “*Hunt Comfort*”. Our trademark spells it out “*The Best Seat in the Woods*”™. You have to try the best hunting cushion built in the world.

First Class

We put you in First Class. We were the first to use medical gel technology for hunters’ enjoyment. We were first to build cushions for handicap hunters. We were first to put a 3 year warranty on a hunting cushion. We developed our own seating comfort fabrics designed specifically for the demands of hunters. We are the only manufacturer to feature products with the patented Intelligel. We have designed FC-1, a remarkably simple and patent pending interconnect system. We were the first to incorporate medical grade HR antimicrobial foam technology in a hunting product. We are always looking to improve your First Class hunting experience.

Success in the Woods

Motionless waiting is demanding and a man moving in a tree is a hunter without a chance. Your odds improve significantly when you remove the discomfort that causes fidgeting. We are all about improving your day with a trophy buck.

Test it out

Our 2006 advertising campaign comes from the wisdom of comfort scientists – you need to put your cushion to the test before you trade your dollars for it. Would you buy a car without a test drive? Would take a rifle hunting without shooting it? It takes approximately 90 minutes to really put a cushion to the test. We know from experience that in 20 minutes you are going to begin to know good from bad.

USA Quality

Our eyes and our hands are involved in production everyday. With in-house operations, we are there to answer your calls in person. We can get answers with anyone at the plant within a minute or two. We invest in our own people and operations for the benefit of our clients.
