“The Best Seat in the Woods”®

Hunt Comfort

Hunt Comfort is building the best hunting seats ever designed for hunters. Our goal remains "pain proof," and hunters across the country are enjoying our products which provide true comfort afield. We are especially grateful for the encouragement, calls and letters that we receive from hunters. Our best ideas always come from hunting enthusiasts, and we are never too busy to listen to a good idea.

We announced four new designs in 2006, and we are constantly refining products that are unmatched in the industry. From Comfort-TEX fabrics to our unique foam formulas, every day we strive to build better products. We have a product lineup for 2007 that gives hunters outstanding new choices for feeling great while hunting. Hunt Comfort understands that your well being and health should always be considered first. Try our products and you will understand.

How it Works

Below are 2 pressure maps of the same man sitting for a test at Hunt Comfort. The top picture is of a typical hunting cushion - this one was purchased from Cabela's for \$25. Chart illustrates poor cushioning. Subject quickly experienced discomfort sitting on this seat.

98% more pressure than the
Hunt Comfort Seat.

The pressure map below is of a Hunt Comfort cushion. We choose this to point out a couple of points. First, you can always see where the subject is favoring a side and pressure is greatest. Secondly and most important, you can clearly see good distribution of pressure - note the wide terrace areas. The distribution of pressure is 75% more effective than the cushion above.
