

The Topper

Is your hunting stool, seat or stand falling short on comfort? If so, remedy the situation with Hunt Comfort's versatile new Topper. Weighing just 1 pound, the Topper seat top will transform any hunting setup into a more comfortable and enjoyable experience. Simple to carry and easy on the wallet, the topper delivers long on comfort.

The Topper is designed as a comfort enhancement for existing seating. When combined with another seat or cushion, the Topper's patented, pressure-relief gel formula benefits the hunter by distributing and reducing seating pressure. The 3-D Intelligel® structure combats hunting fatigue and helps pain proof those long waits. This technology is an astounding advantage during motionless waits for game.

Measuring 10x14x1 inches, the Topper is easy to roll up and small enough to stuff in your hunting jacket, or you can place it on your car seat and drive to your destination in comfort. The Topper is an easy-to-carry, light-weight, high-performance seating element that radically improves mediocre seating.

The Topper is the first to feature Hunt Comfort's next generation Comfort-TEX outdoor seating fabric, which improves cushion mechanics and reduces harmful shear effects on the skin. Omni Stretch, waterproof and tough as pig hide, Comfort-TEX gives in all directions and feels soft to the touch. Topper is built with a Toughtek® bottom. Toughtek is an abrasion-resistant, leather-like fabric made of 100% polyester backing with a rubber outer coating. Coated with a copolymer formula on one side, its rugged surface does not slip and is built to withstand the rigors of hunting.
