

## Hunt Comfort Introduces New Topper

Designed to transform mediocre seating into something extraordinary, Hunt Comfort's Topper is now more versatile than ever featuring three new design improvements to an already remarkable product. At the request of its customers, Hunt Comfort has added a 13-inch-long carrying strap and a convenience loop for attaching the Topper to pants or a vest. A new ½-inch foam foundation has also been added to increased comfort performance. Weighing just 1 pound, the Topper is designed as a comfort remedy for hunting seating.

When combined with another seat or cushion, the Topper's patented, pressure-relief gel formula distributes and reduces seating pressure to combat hunting fatigue and to help pain-proof those long hunts.

Measuring 10x14x1 inches, the Topper is easy to roll up and small enough to stuff in your hunting jacket, or you can place it on your car or ATV seat and arrive at your destination in comfort.

The Topper features Hunt Comfort's next generation Comfort-TEX waterproof outdoor seating fabric, which improves cushion mechanics and reduces harmful shear effects on the skin. The Toughtek® bottom is an abrasion-resistant fabric made of 100% polyester backing with a rubber outer coating. Its rugged surface is non-slip and is built to withstand the rigors of hunting.
